## CLEARVUE INFORMATION

If you need further information on ClearVue visit [www.clearvue.co.nz](http://www.clearvue.co.nz). Otherwise we have a dedicated ClearVue team that can answer any questions and give you quotes contact either Paula Gibbs [paula@psp.co.nz](mailto:paula@psp.co.nz) or Peter Tom [petert@psp.co.nz](mailto:petert@psp.co.nz).  
Note: The ClearVue Translucent Roofing System is a water resistant system, not a waterproof system.

### SAFETY

Never walk directly on ClearVue Roofing System panels. Use a board placed across at least 3 rafters to spread the load.  
**Ensure all local safety building regulations/codes are adhered to.**

### HANDLING & STORAGE

ClearVue Roofing System Panels should be handled with care to avoid any unnecessary scratches prior to installation. ClearVue should be stored on a flat surface away from direct sunlight. When stacked together this will prevent possible magnification of the sun's rays through the top sheets which may cause distortion of the lower sheets. Prevent moisture getting between stored sheets. ClearVue will continue to look new when washed down regularly with a soft sponge and warm soapy water. ClearVue Panels are unaffected by a wide range of chemical substance however, it is important to avoid chemicals, paint, adhesives or other synthetic materials that are not compatible with Acrylic and Polycarbonate. Please contact PSP Translucent Roofing if you are unsure.
