# Shaderunner<sup>®</sup> PRO

retractable shade system

The flexible design of the **Shaderunner<sup>®</sup> PRO** Retractable Shade System is ideally suited to a range of applications around the home, from outdoor entertaining spaces and patios to swimming pool and courtyards. With a wide range of fabrics and colour options available, the Shaderunner<sup>®</sup> complements all architectural styles, from contemporary suburban homes to traditional country residences.

- ✓ ✓ ✓ Retractable shade on demand
- ✓ ✓ ✓ Manual or motorised operation
- ✓ ✓ ✓ Individual replaceable panels
- ✓ ✓ ✓ Summer shade or winter sun
- ✓ ✓ ✓ UV protection & glare reduction
- ✓ ✓ ✓ Durable design with marine grade fittings
- ✓ ✓ ✓ Large or small spans with minimal structure

Swimming Pools

Entertaining Spaces

## CONVENIENT CLIMATE CONTROL

This simple yet functional system provides the ultimate convenience of **controllable shade on demand**, maximising the use of outdoor spaces in the Australian climate.

Each **Shaderunner® PRO** is individually designed and manufactured - a flexible approach that provides comprehensive site-specific shading that off the peg retractable systems simply cannot accommodate.

Constructed from **durable components** and **rigorously tested fabrics**, the **Shaderunner® PRO** provides a robust retractable shade solution capable of spanning large areas with minimum support structure beneath - an important factor when considering the shading of commercial or public spaces.

Most **Shaderunner® PRO** systems feature an easy to use **manually operated endless cord system** with horn cleat tie off point. Very large or inclined systems may also include a winch to assist operation.

The **Shaderunner® PRO** system can be manufactured from a **wide range of fabrics** including **Polyester Mesh** for dependable shading with 95% block out, to **translucent Waterproof PVC** for a weatherproof solution. Each fabric is mould resistant and offers protection from glare and harmful UV rays, with a wide range of colours available.

For the ultimate convenience the **Shaderunner® PRO** can be motorised with an **RTS motor** housed in a **slimline powdercoated headbox**. Controlled using a hand-held remote or wall mounted switch, further automated control can be provided with the addition of **sun, wind, and rain sensors** to extend or retract the Shaderunners® during weather events.

### Durable Fabrics

The **Shaderunner® PRO** is manufactured from a range of **rigorously tested fabrics** which are as durable as they are stylish, being designed to withstand high traffic applications and the demands of the harsh Australian climate with ease.

**Polyester Mesh** (10 Year Warranty)  
90-95% UV block out for shade and glare reduction.

**Waterproof PVC** (10 Year Warranty)  
Translucent all-weather UV protection (system requires side fall for water runoff)

**Warranty\***

The **Shaderunner® PRO** is durable by design and will provide **years of trouble free use**. For peace of mind, this is backed up by the following warranties:

- ✓ 5 years on components & workmanship
- ✓ 5-10 years on fabrics
- ✓ 10 years on fabric stitching or welding
- ✓ 2-5 years on motors

\*Warranty assumes 25 knot maximum usage - wind damage is not covered

**Durable Components**

The **Shaderunner® PRO** is constructed using only the most robust components including custom designed **marine grade Ronstan ball bearing pulleys & 316 stainless fittings**. These low friction ball bearing pulleys ensure continued ease of use and durability.

**Strong by Design**

Robust aluminium extruded support profiles allow large spans of **up to 7.0m wide\* with a single system**. For wider areas additional systems can be added for further coverage.

\*conditions apply

**High Strength Fittings**

High strength 316 stainless steel running wires and tension fittings enable large extensions.

Larger spans are possible subject to site conditions & structural design. Also possible with twin Shaderunner® fabrics running on the same wires, stacking at both ends and extending to the centre.

**Simple Operation**

**Manually operated Systems** feature an endless cord system to easily extend and retract the fabric, with the cord then secured and tied off at the horncleat.

For very large systems, or where the Shaderunner® is sloped or angled, a **manual winch** can be added to aid operation. When not in use the winch handle can be detached and stowed away.

**Remote motorised operation** is also available for the ultimate convenience if preferred. The Shaderunner is effortlessly extended at the touch of a button with the **remote control**.

### **Specification**

- Width:** 7.0m maximum\*, 2.0m minimum for motorised
- Extension:** Large extensions possible with minimal structure, subject to structural integrity of support structure & engineering requirements
- Fabric Drop:** 250-500mm typical stowed fabric depth (custom designed to suit site conditions)
- Running Wires:** 2 x Stainless Steel Wires as standard\* (additional wires where required)
- Operation:** Manual operation as standard with endless cord system & cleat  
Motorised option with remote controller\*
- Motor type:** RTS motor in powdercoated slimline headbox
- Sensors:** Optional wind, sun or rain sensors
- Wind resistance:** Warranty to 25 knot maximum wind speed

\*conditions apply

### **Range of Support Options**

Versatile by design, the Shaderunner<sup>®</sup> is ideally suited to a range of structural support systems. The Shaderunner<sup>®</sup> is typically fixed to **buildings, fascias, walls, posts, pergolas, custom structures** or a combination of these - plus more.
