# CONTROL OPTIONS

Manual

Adjusting the blind using cord or chain mechanisms

Automated

Operated via a remote control or wall switch (Somfy or Galaxy)

Manual (with handle)

If blind is located higher off the ground - can be operated with a special control rod

Manual (with cardan stick)

For PLK systems - ceiling and conservatory blinds that are difficult to reach manually

CONTROL STICK OPTIONS

Standard Control Stick can be used together with handle operated blinds (VS, PL systems)

**Flexi Control Stick** can be used together with handle operated blinds (VS, PL systems)

Hinge Joint Control Stick used for skylight (Velux) blind systems (DF Comfort Lux)
Cardan Control Stick used for PLK systems - ceiling and conservatory blinds that are difficult to reach manually

RAIL TYPES

One Channel
Used in system VS2 and other systems in a combination with a two-channel rail

Two Channel
Used in the majority of systems, separately or together with one-channels and high rails

High Rail
Used in chain-operated, cardan and automated systems

CHILD SAFETY

All blinds with **cord control** can be enhanced with a safety feature. This feature, called the "Child Safety Cord Winder," automatically activates when the cord is extended up to 60mm and under a pressure of 6kg. Once activated, you can easily retract the blinds to their original position.

Blinds with **chain control** can be also equipped with a safety mechanism. It activates when a load over 6kg is applied to the chain. The mechanism (guide wheel) can be easily reset to its original position.

The main plastic parts (caps, control handles, tension blocks) match the colour of the cornices perfectly.
Some less popular parts are available in only three or four colours.

Exceptions for the bronze colour:
For systems with cord control in bronze, the wall anchors for cords are dark chocolate.
In the F Slope 2 system, the corner connecting hinge is black.
For the ceiling system PL 11, the mounting profile and its fastening elements are brown.
Certain mounting elements, such as the bracket-clamp, mounting plate, non-drilling bracket with clamp, and
some others are not available in bronze.
