SunGuard ClearVue®
Aluminium Pergola

Our aluminium pergolas are fully custom made to suit each project, using high-quality components. They can be **wall-mounted, fitted with custom soffit brackets or designed as a standalone structure**, with **powder coating available in any Dulux colour**.
Our roofing systems can be installed on existing structures, with **pitch adjustment kits** available where required. For larger pergola projects, SunGuard can also **assist with the engineering and building consent process.**
Complete your outdoor area with **Ziptrak® or Omni outdoor blinds**, or **Muriwai aluminium shutters**.

ROOFING PANEL OPTIONS
We offer several roofing options to suit different projects and budgets:

- **ClearVue®** – Premium: 8 mm acrylic panels offering excellent clarity, durability and a premium finish.
- **Suntuf® SunGlaze** – Value: 4 mm polycarbonate panels providing a practical balance of performance and value.
- **EZ Glaze®** – Budget: 3 mm polycarbonate panels for a cost-effective roofing solution.

Other roofing materials can also be supplied where required, including 6/8mm UGS panels, depending on the project.

ClearVue® Roofing

ClearVue® is our premium pergola roofing option, combining excellent light transmission with the clean appearance of glass while remaining lightweight and impact resistant.

- NZ's only BRANZ appraised translucent roofing system
- Excellent light transmission – up to 89%, with excellent clarity
- Impact resistant – acrylic panels are 17 times stronger than glass
- Lightweight – around half the weight of glass
- UV resistant – designed to resist yellowing and discolouration from sunlight
- Durable – resistant to scratches and corrosive environments
- Thermally efficient – effective insulation and blocks up to 45% of heat
- 15-year full replacement warranty on panels (Ts & Cs apply)

ClearVue®Grey Tint Panels

01 PERGOLAS

SunTuf® SunGlaze & EZ Glaze Roofing

SunGlaze and EZ Glaze roofing systems offer a stylish, practical, and cost-effective way to protect your outdoor living space while maximising natural light. Made from durable polycarbonate, they provide the clean, modern appearance of glass without the weight, complexity, or cost, making them an ideal choice for pergolas, patios, carports, deck covers, awnings, and other outdoor structures.
Designed for NZ conditions, both systems deliver outstanding weather resistance and long-lasting performance. They are engineered to withstand harsh sun, wind, rain, and hail while maintaining their clarity, strength, and appearance for years to come.

KEY FEATURES

Bright, Comfortable Outdoor Spaces

Both systems allow abundant natural daylight to filter through while protecting against harmful UV rays. Optional tinted or opal panels help reduce heat and glare, creating a brighter, more comfortable outdoor environment without compromising on natural light.

Modern Glass-Like Appearance

Unlike traditional corrugated roofing, SunGlaze and EZ Glaze feature smooth, flat panels that create a clean, contemporary finish. SunGlaze uses aluminium glazing bars for a premium architectural look, while EZ Glaze incorporates an interlocking panel system that delivers a sleek appearance with fast, straightforward installation.

Practical & Cost-Effective

Offering many of the visual benefits of premium acrylic roofing systems at a more affordable price, SunGlaze provides an excellent balance of style and value. EZ Glaze is the most economical option in the range, making it an ideal solution for budget-conscious projects without compromising on durability or performance.

WARRANTY (Ts & Cs apply)

Roofing Panels - 15 years (against yellowing, loss of light transmission, excessive UV weathering, and hail damage)
Installation - 5 years
Workmanship - 5 years

Omega Retractable Pergola

Somfy Automated

Transform your outdoor living areas with **the Omega Pergola**, a retractable roof system designed to expand and enhance your space.

Engineered to withstand New Zealand's challenging weather, the Omega Pergola is proudly manufactured locally, ensuring consistent quality and great turnaround time. This robust system boasts impressive wind resistance, capable of enduring winds up to scale 10 Beaufort (48-55 knots).

KEY FEATURES

Expansive Coverage: Up to 15m wide and 10m projection with 4 modules
Customisation: Tailored hardware colours and configurations, with or without supporting posts
Optional Features: Integrated LED lighting, Wind/Rain/Sun sensors, compatibility with outdoor blinds

ADDITIONAL DETAILS

Recommended Pitch: 9 degrees
Operation: Somfy motorisation
Frame Colour: Custom powder coating (Dulux range)

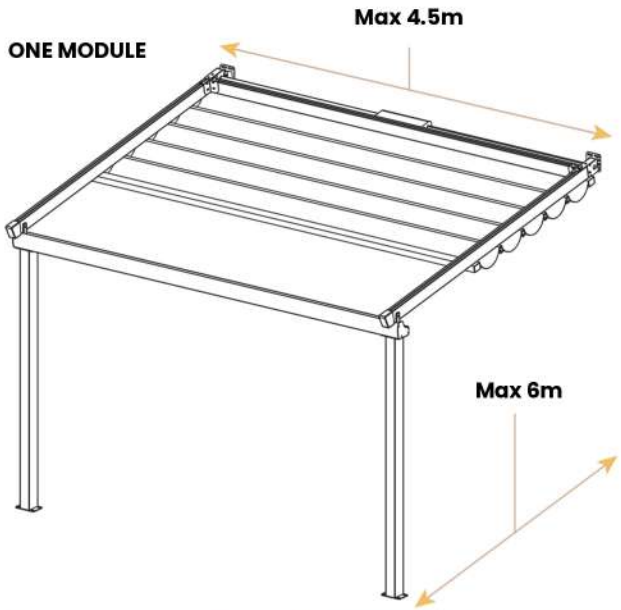

FABRIC

Serge Ferrari waterproof fabrics - lightweight, durable, and 100% recyclable, ensuring longevity and sustainability.

- Soltis Proof W96: Textured, neutral shades with high dimensional stability.
- Soltis Proof 502: Heavy-duty, satin finish membrane for superior weather protection.

Automation (Somfy) - 5 years

02 OUTDOOR BLINDS

Ziptrak®

Premium track-guided drop down screen

Transform your outdoor space with the premium Ziptrak® exterior screen system, proudly made in NZ. Designed to provide superior protection from sun, dust, wind, and rain, this outdoor blind ensures year-round comfort for your entertaining areas.
The Ziptrak® system features a spring-loaded mechanism for effortless manual operation, allowing the screens to glide smoothly and stop at any desired position. For added convenience, automation packages with wind and sun sensors are available.
Every Ziptrak® screen is custom-made to fit your specifications and can be installed either between posts and walls or onto surfaces using face-fix channels. With a sleek, cord-free design, there are no wires or floor locks, ensuring an unobstructed view and enhanced safety.

Omni (Café) Blind

Crank handle operated drop down screen

Designed and manufactured in NZ, Omni screens, also known as Café blinds, combine practicality with style. Tailored to suit commercial and residential project needs, Omni come in three different modifications – **Lite, Guide** and **Channel.**

Omni Lite is a minimalistic straight drop screen with floor level stainless steel anchors. Can be crank handle operated or automated, rolls neatly away when not in use.

Omni Guide is fitted with stainless steel guide wires installed at the sides of the screen. The wire guides allow safe operation when rolling away and minimise flapping in the wind when the blind is halfway open.

Omni Channel is the most popular system with aluminium side channels that increase protection and provide a streamlined finish. Blind locks are integrated into the bottom bar, leaving the floor free of hooks or latches.

Finish: Clear and Tinted

Mesh & Opaque Fabrics

At SunGuard, we use premium quality fabrics from two esteemed brands: **Serge Ferrari** (France) and **Shadeview** (Australia).

ShadeView provides a classic aesthetic with its basket weave fabrics. Skillfully engineered, Shadeview fabrics diffuse light, optimize views, and block up to 99% of the sun's rays, ensuring both comfort and style in any outdoor environment.

Serge Ferrari Soltis series offers practical durability with exceptional heat and UV protection. These soft, perforated fabrics create cosy, shaded outdoor areas with glare-free visibility. Their modern patterns and extensive colour palette effortlessly enhance any setting and are easy to maintain.

We can also offer **Docril acrylic canvas**, known for its 100% solution-dyed acrylic material from Spain. Docril boasts exceptional dimensional stability, high water repellence, and strong resistance to abrasion, rot, and mildew. With fantastic colour fastness rating, Docril offers 79 premium fabrics in plain and striped designs, providing excellent sun protection by blocking up to 90% of harmful UV rays.

Fetuna Cassette

The Fetuna Cassette showcases elegant French design and superior components, meticulously crafted to measure in Auckland. Its enclosed cassette protects the fabric and mechanism when retracted, ensuring longevity and minimal maintenance.
Made with premium powder coated, rust-resistant aluminium and marine-grade stainless steel hardware, the Fetuna Cassette is built to last while adding a touch of sophistication to any space.

	MINIMUM & MAXIMUM SIZE (WIDTH X EXTENSION)	HARDWARE COLOURS	FABRIC	OPERATION	INSTALLATION	OPTIONAL AUTOMATION

Integral Cassette

The Integral Cassette boasts sleek French design, high-quality components, and is made to measure in New Zealand. This full cassette awning fits seamlessly into any architectural style, requiring just 180 mm of wall space. It is supplied with a support beam (timber or aluminium) installed onto the wall/soffit, as it only has two brackets (one per side). The full cassette design means the fabric and arms are fully protected from the back as well, encapsulated for a clean look and effective protection when retracted.

03 AWNINGS

Ellipse

The Ellipse is our go-to awning, known for its simplicity and charm with locally sourced components for budget-friendly pricing. It can be fitted with an optional half pelmet made of powder coated rust-resistant aluminium, which covers the top of the awning and is highly recommended for automated units to provide extra protection to the motor and canvas. Additionally, the Ellipse features an adjustable pitch option that is manually operated with a crank handle, allowing you to effortlessly adjust the angle of the awning as needed.

Horizon

The Horizon is our premium heavy-duty open-type awning, designed in France and expertly made in NZ, trusted here for over 15 years. Built with reinforced mounting brackets, this awning ensures superior durability and stability. Standard hardware colours include warm white, silver pearl, and matt charcoal. For enhanced durability, especially for automated units, the Horizon can be fitted with an optional half pelmet that covers the top of the awning, safeguarding the motor and extending the lifespan of the canvas.

Vertigo Window Awning

The Vertigo drop arm awning stands out as one of the sturdiest and most wind-resistant shade options available, thanks to its four-point fixing system. Engineered in France and crafted in NZ, it combines robustness with refined design for exceptional durability and performance. Available with 1m and 1.5m long arms and in widths up to 4.5m, it seamlessly complements sliding doors and windows, blending elegance with practicality.

	MINIMUM & MAXIMUM SIZE (WIDTH X ARMS LENGTH)	HARDWARE COLOURS	FABRIC	OPERATION	INSTALLATION	OPTIONAL

Waterproof Fixed Frame Awning

Custom-made in New Zealand, our **fixed frame awnings** are engineered to endure all weather conditions. The welded, high-quality extruded aluminium frame is securely attached to the building without the need for additional posts and can be customized with any Dulux colour in a powder coated finish.

We offer a range of frame shapes to suit various aesthetic preferences, including classic wedge, Spanish hoop, and vertical hoop. For businesses, our fixed frame awnings can feature a flat front message panel for signage printing.

Enjoy peace of mind with our 5-year warranty covering framing and workmanship.

FABRIC

Choose from 34 colours in the Austrian-made Diamond 700 Series for effective defence against sun, wind, and rain, backed by a 5-year warranty. Opt for the Diamond Translucent PVC in white or grey for warm shade, enhanced by a weldable PVDF coating and a generous 7-year warranty.

Automation

SOMFY
A global leader in shade motorisation, Somfy delivers premium European quality backed by 50 years of innovation and a 5-year warranty.
Motors: RTS (wireless) and WT (wired) options with "my" favourite position and smart home compatibility.
Weather Sensors: Intelligent sun, wind, and rain sensors for responsive outdoor shading.
Control Units: Sleek Smoove RTS wall remotes and multi-channel handhelds with "my" button.
Connexoon WiFi Hub: App-based control with voice command support for up to 4 devices.

DOOYA
Dooya is a China-based manufacturer of tubular motors for indoor and outdoor shading systems. Known for consistent quality and reliable performance, their motors offer excellent value - thoughtfully engineered and backed by a 5-year warranty.
Motors: WT and RTS versions, with manual override option for open awnings.
Weather Sensors: Wireless sensors for automatic retraction in high winds and sun/rain response.
Control Units: Wall switches and remotes (1–16 channels).
P-Box WiFi Hub: App control by product, zone, or whole home, with scheduling.

Shadowspec®
Heavy Duty Umbrellas

Designed and manufactured in New Zealand, Shadowspec® heavy-duty umbrellas combine premium engineering and exceptional durability to create outstanding shade solutions for residential and commercial outdoor spaces. Available in cantilever, wall-mounted, and single/multi canopy configurations, Shadowspec® umbrellas are supplied in a range of popular colours and standard sizes for fast installation.

KEY FEATURES

Designed & Made in New Zealand

With over 25 years of New Zealand design and manufacturing expertise, Shadowspec® umbrellas are engineered specifically for our harsh UV levels, coastal environments, and ever-changing weather conditions, delivering outstanding performance and long-term reliability.

Premium Materials & UV Protection

Constructed from marine-grade aluminium with 316 stainless steel components, Shadowspec® umbrellas are built to resist corrosion and withstand demanding outdoor environments. Premium Sunbrella® canopy fabrics provide exceptional durability together with UPF 80 sun protection, while also resisting fading, mould, mildew, stains, and water.

Smooth & Effortless Operation

Advanced lift and rotation mechanisms allow the umbrellas to open, close, and reposition with ease. Cantilever, wall-mounted, and centre-pole options provide flexible shade exactly where it's needed, without compromising your outdoor layout.

Versatile Shade Solutions

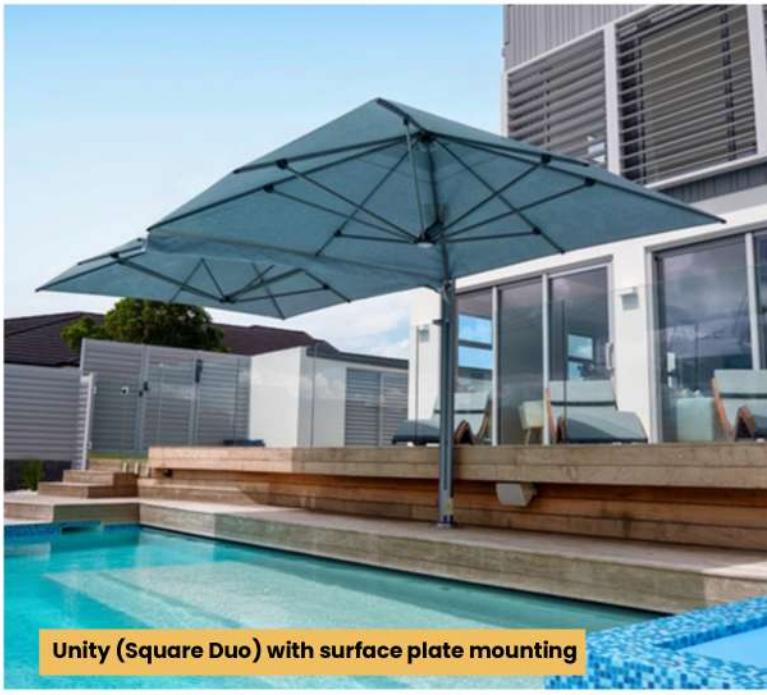

Ideal for decks, patios, swimming pools, cafés, restaurants, wineries, schools, commercial courtyards, and hospitality venues, Shadowspec® umbrellas combine elegant design with practical functionality. Available in a range of standard sizes and colours, they can often be supplied and installed much faster than fully custom-made shade systems.

Retreat (2.7m extension), wall mounted

Unity (Square Trio) with surface plate mounting

05 SHADE SAILS

SunGuard shade sails are custom-made in New Zealand for residential and commercial projects, from decks and backyards to cafés, schools, playgrounds and larger outdoor areas. We offer two edge-finish options to suit different sail sizes and locations:

WIRE EDGE

Recommended for larger shade sails and exposed or windy locations, particularly sails over 30m perimeter. The wire edge can be adjusted on site for accurate tensioning and a secure fit.

- 4–8mm stainless steel wire options
- 7 × 19 strand cable for strength and flexibility
- On-site adjustment for accurate tensioning
- Marine-grade 316 stainless steel components

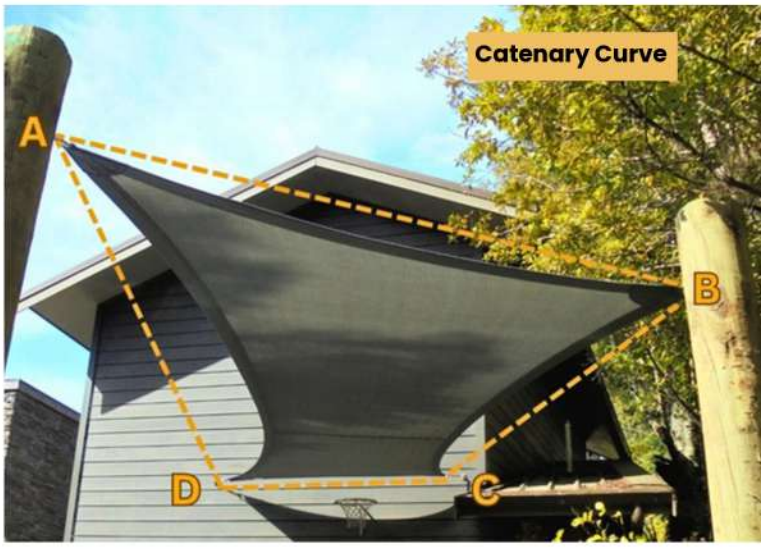

WEBBING EDGE

Recommended for smaller residential shade sails. A practical option that is easier to remove or self-install if required.

- Strong, UV-resistant polyester webbing
- PTFE sewing thread for long-term outdoor durability
- Marine-grade 316 stainless steel hardware
- Clean, simple finish suitable for most residential applications

MESH SHADE FABRICS

Around 95% of the shade sail projects use mesh fabric, offering excellent sun protection and shade while allowing airflow.
Our heavy-duty options include **Com95®, Extrablock 330®** and **Monotec 370®**, providing up to 99% UVR block while still allowing light and air to pass through. Developed in Australia, these durable HDPE fabrics offer excellent strength while helping reduce heat and glare. They are also resistant to stains, dirt and grime, eco-friendly and 100% recyclable.

WATERPROOF FABRIC

For waterproof shade sails, we use **Serge Ferrari Soltis Proof 502**, a high-quality PVC-coated fabric that provides protection from both sun and rain. Waterproof shade sails have stricter structural and installation requirements than mesh sails, as the solid fabric catches more wind and needs sufficient fall for rainwater runoff. Stronger posts, structures and attachment points are generally required, along with a minimum height difference of 10% of the side length between attachment points to ensure adequate drainage.

FABRIC	SHADE FACTOR (varies by colour)	UVR BLOCK (varies by colour)	COLOURS	FEATURES	UV WARRANTY (Ts & Cs apply)
Com 95 (340 gsm mesh)	71–88%	74% - 95%	14	• Stain, grime & mildew resistant • Abrasion-resistant yarn • Oeko-Tex® 100 & Greenguard® certified • Fire-retardant option available	15 years (standard fabrics), 12 years (FR fabrics)
Monotec 370 (370 gsm mesh)	84% - 89%	84% - 89%	15	• Stain, grime & mildew resistant • Extra-wide fabric minimises seams on larger sails	15 years
ExtraBlock 330 (330 gsm mesh)	96% - 98%	96% - 98%	21	• Rot, mould & mildew resistant • Fire-retardancy rated (Cream, Beige, Yellow & Red are not FR)	10 years
Waterproof (PVC) Serge Ferrari Soltis Proof 502	80% - 90%	82% - 99%	40	• Waterproof • Stain, grime & mildew resistant • Fire-retardancy rated • Requires a pitch between attachment points for rainwater runoff	10 years

Kissing Point

Awning Track

CUSTOM DESIGN
Every SunGuard shade sail is custom-designed to suit your project, with the shape, size and number of attachment points tailored to your space.

FIXINGS
A range of marine-grade stainless-steel fixings is available, selected to suit the sail size, attachment points and installation requirements.

CATENARY CURVE
Shade sails typically have a 5–7% catenary curve for even tension and stability. Additional attachment points can be added to minimise the curve and maximise coverage.

AWNING TRACK
Where a sail runs along a wall or beam, a sail track can eliminate the gap between the sail and the structure for greater shade coverage.

KISSING POINTS
For sails installed side by side, a suspended mid-point can connect adjoining sails, reducing gaps without requiring an additional post.

POSTS & INSTALLATION
We supply and install galvanised steel posts in 114mm, 140mm and 168mm OD, up to 6.5m long, with optional powder coating in your choice of Dulux colour. Hydro excavation and temporary fencing can also be arranged where required.

Star Structure

Built around a strong galvanised steel centre pole and framework, Star Structures provide generous shade with a distinctive architectural look.

- ✓ **Poolside areas**
- ✓ **Playgrounds & skate parks**
- ✓ **Picnic areas**
- ✓ **Schools & outdoor dining areas**

ENGINEERED DESIGN
Star Structures are pre-engineered for structural strength and safety, providing a robust, long-lasting shade solution for commercial and public spaces.

GALVANISED FRAME
The steel framework is galvanised inside and out for long-term corrosion protection, with an optional painted finish. Corner tensioning components are fully adjustable, with marine-grade stainless-steel hardware and galvanised structural bolts.

SHADE FABRIC
Made from heavy-duty commercial shade fabric, the canopy provides excellent sun protection while allowing light and airflow. Depending on the selected fabric, it can provide up to 95% UVR block. The fabric is securely tensioned and sewn with durable PTFE thread for long-term outdoor performance.

COMPLETE PROJECT SERVICE
From design through to installation, SunGuard can manage your Star Structure project from start to finish, including site assessment, engineering, foundations, fabrication and installation.

WARRANTY
Star Structures are backed by a 10-year warranty.

06 RETRACTABLE WAVE SHADES

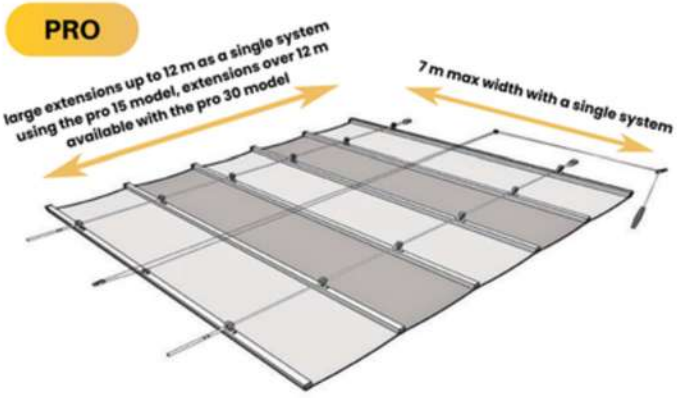

Shaderunner®

A fully custom made high quality shade system designed to cover large areas or more complicated sites that other retractable shade systems cannot manage.

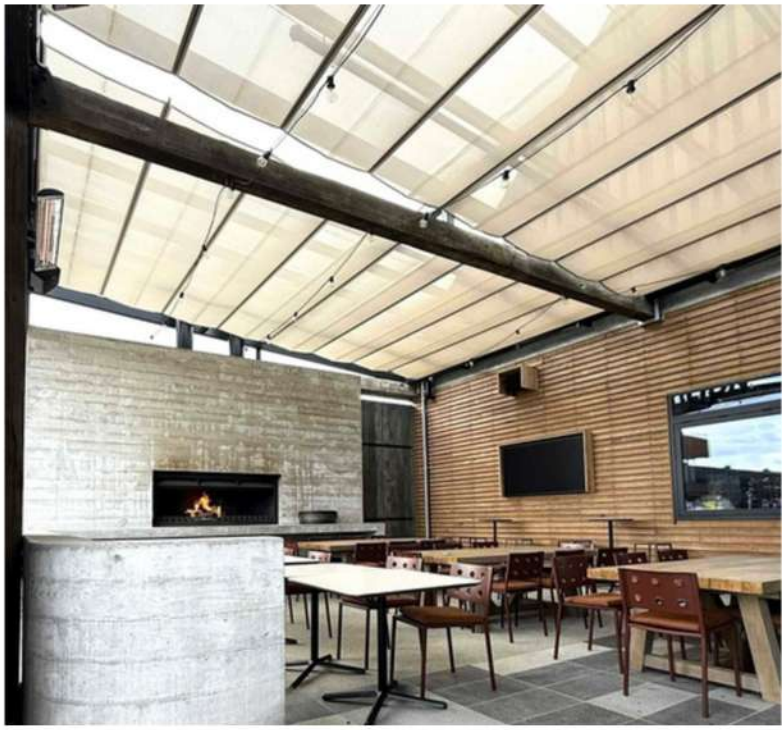

BEST CHOICE
EXCLUSIVE IN NZ
PREMIUM QUALITY

KEY FEATURES
Modern design
Can be folded away when not in use
Can span large areas - up to 7m (width) x 12m (extension)
Mesh & waterproof fabrics available
Effective protection from UV rays
Manually operated (infinite cord & winch) or Somfy motorised

WARRANTY (Ts & Cs apply)
Components - 5 years
Fabrics - 5-10 years
Somfy motors - 5 years
Fabric stitching/welding - 10 years
Workmanship - 5 years

The Shaderunner® can be set up on a pre-existing or custom-made pergola, or between walls, fascias, and standalone posts. Manufactured using only the most durable 316 stainless steel fittings and marine grade Ronstan ball bearing pulleys, the Shaderunner® provides years of hassle-free shading with minimal maintenance. The latest PRO model features customizable fittings throughout for added versatility. Each fabric panel is individually fitted into the spars, allowing for easy replacement and the option to mix colours.

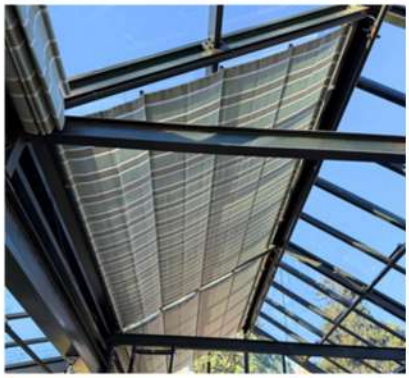

Fabric drop: 250-500mm typical stowed fabric depth (custom designed to suit site conditions)
Running Wires: 2x Stainless Steel wires as standard (additional wires where required)
Operation: Manual operation with endless cord system Motorised option with remote (conditions apply)
Motor type: Somfy RTS motor in powder coated slimline headbox
Sensors: Optional wind, sun or rain sensors

FABRICS
Vistaweave 95 is a high-quality woven mesh fabric ideal for outdoor applications such as blinds, awnings, and marine shades. Its distinctive weave blocks the sun's rays while providing an attractive textured look. It's mildew and saltwater resistant. Trusted in Australia and New Zealand for over four decades.
For waterproof shades, we use premium French-made fabrics **- Serge Ferrari Soltis W96** and **Soltis 502**. Both offer heat and weather protection, are dirt resistant, and easy to maintain. Serge Ferrari fabrics feature high dimensional stability due to their patented Precontraint® technology.

Wave Shade

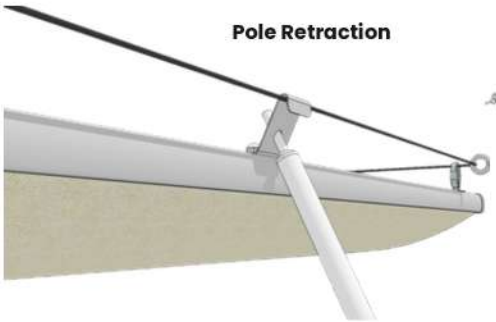

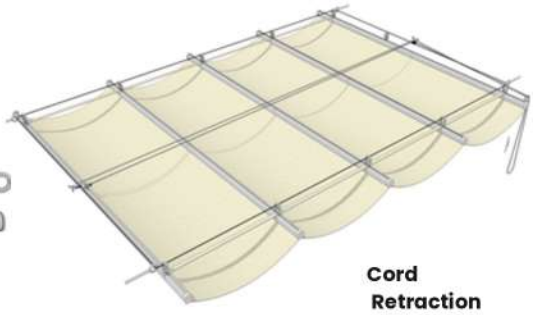

Wave shades provide a stylish and practical alternative to traditional shade sails, and are ideal for residential or commercial outdoor areas. They are fully customizable and designed to withstand tough weather conditions. You can extend or retract the shades in seconds, and they come in various colours, suitable for timber and aluminium pergolas. Each wave shade system is tailored to your project's specifications, ensuring a perfect fit. They come with a 5-year warranty.

OPERATION

Wave shades offer user-friendly operation with two retraction options: an integrated cord system or a pole retraction system. The cord system uses a stainless-steel pulley and a braided polyester cord, functioning like a blind, with the ability to lock the shade halfway. The pole system involves an aluminium pole that hooks onto a stainless-steel cleat, manually retracting and extending the shade.

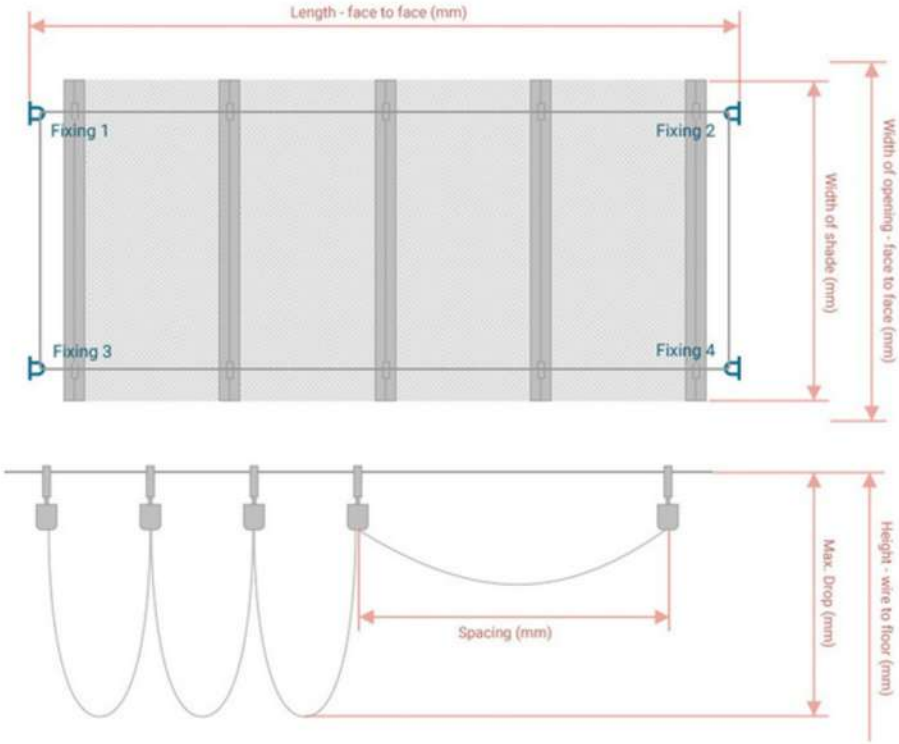

COMPONENTS

High-quality components and fabrics ensure durability. Marine-grade stainless steel fittings make them suitable for coastal areas. Standard spars come in silver pearl, with custom Dulux powder coating available.

CUSTOMIZATION

Width, length, colour, depth of billows: customizable for a precise fit
Drop: standard drop is 400-450mm, adjustable to a minimum of 280mm if needed
Billow: standard billow is 180mm, with options for a shallower or deeper look

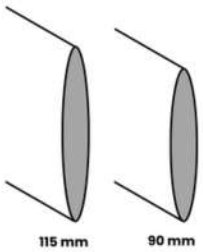

FABRIC

Wave shades use commercial-grade, mildew, and mold-resistant fabrics that offer high UV and heat protection. They are fade-resistant, easy to clean, and come with a 5-year warranty.

- **ShadeView 300:** A high-performance, fire-retardant mesh with a 5% openness factor, available in 15 colours
- **Serge Ferrari Soltis Lounge 96:** Micro-perforated for natural light and airflow, offering tree-like shade. Features Précontraint® technology for durability and stability
- **Serge Ferrari Soltis Proof W96:** A waterproof solution that protects against UV and weather while allowing natural light transmission

Muriwai - NZ Made

Elevate your outdoor space with our elegant **Muriwai Aluminium Outdoor Shutters**. Crafted in New Zealand from premium materials, the Muriwai Series seamlessly combines style and strength for both interior and exterior use.
Built to withstand high winds, these shutters underscore SunGuard's commitment to quality, utilizing top-notch aluminum and 316 stainless-steel components for longevity and resilience against the elements. With a **5-year finished product warranty**, Muriwai ensures both style and durability, requiring minimal maintenance and contributing to improved energy efficiency through its heat-deflecting properties.

FULLY CUSTOMISED
Tailor Muriwai shutters to your needs with flexible fixing and blade options. Choose from **fixed in channels, off-the-wall built-out frames, hinged, sliding,** or **bi-folding configurations.**
Choose blade size between **90 mm x 12 mm** or **115 mm x 15 mm.**

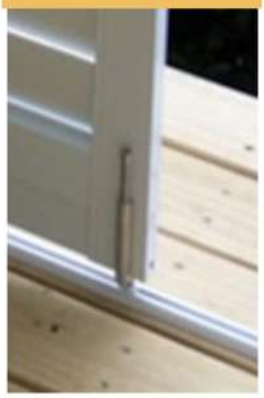

Explore a palette of powder coating colours, including standard choices like **Pearl White and Satin Black**. For a truly unique look, delve into custom colours from the **Dulux Duralloy** or **Interpon** ranges.

INTERIOR SHUTTERS 08

Enhance style and comfort with our custom interior shutters, featuring adjustable slats to control sunlight, airflow, and privacy effortlessly. Available in configurations like **U-channel fixed, hinged, bi-fold,** and **sliding panels**, our shutters suit diverse homes across New Zealand—city, countryside, or coast. For properties in corrosive environments, we offer robust **stainless-steel hinges** and **ball latches** for lasting durability.

Discover the timeless **Wanaka Timber Plantation Shutters**, known for lightweight durability and classic elegance, in over 30 colours, including stunning painted finishes. For a modern option, explore **Omaha PVC Plantation Shutters**, moisture-resistant, aluminium-reinforced, ideal for kitchens and bathrooms with customisation rivaling timber.

Choose from a range of tilt options to match your style: the popular **clearview tilt** features a discreet side-mounted rod, located at the back of the shutter panel, allowing you to turn all blades at once. For a streamlined look, the **invisible tilt** conceals the rod within the panel. We also offer the classic **front tilt** rod, centrally placed, or the **offset tilt** rod, positioned along the side for a modern aesthetic.

09 VENETIAN BLINDS

Venetian blinds are the ultimate solution for enhancing privacy and controlling the sunlight in your room. At SunGuard, we offer a wide selection of Venetian blinds crafted from premium timber, versatile PVC, and sleek aluminium. Our blinds come in 25mm, 50mm, 60mm, and 63mm slats and a variety of colours for the other sizes to suit any décor. All our Venetian blinds come with a reassuring 5-year warranty – terms and conditions apply.

Marupa Timber

Available in 50mm slats (White, Black, Alabaster, Light Oak, Dark Oak) and 60mm slats (White).

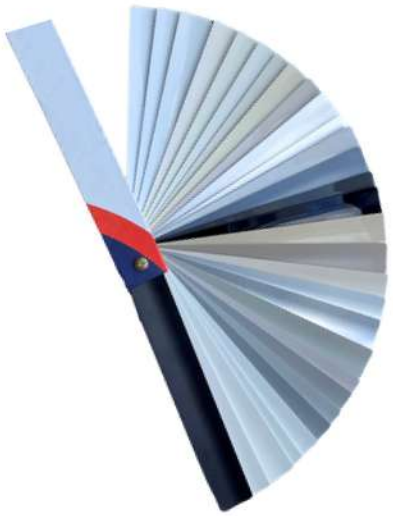

Expertly crafted in New Zealand from high-quality Marupa (Simarouba amara) timber, these Venetian blinds are both durable and lightweight, perfect for any window size. The sustainably sourced Marupa timber exudes warmth and charm, and each slat is treated with advanced UV protective coatings to ensure long-lasting beauty and performance. Our timber blinds come with colour coordinated fascias (75mm), cords, and tapes, and include hold-down brackets for added stability. Customizable to fit windows as small as 250mm wide, these blinds offer elegance and functionality.

Woodefex PVC

Available in 50mm slats (White, Off-White, Canvas) and 63mm slats (White).

Woodefex Venetian blinds are a stylish and economical alternative to traditional timber blinds. Made in New Zealand from durable, UV-treated polyresin, these blinds are highly resistant to heat and humidity, making them ideal for kitchens, bathrooms, and laundries. The innovative material prevents bending or warping, ensuring easy operation and longevity. Available in three warm, neutral shades—white, off-white, and canvas—Woodefex PVC blinds provide a timeless, clean look. These blinds can be custom-made to fit windows as small as 250mm wide, offering both practicality and sophistication.

Aluminium

Available in 25mm slats (over 20 colours) and 50mm slats (Alabaster, Desert, Silver, White).

Our custom-made aluminium venetian blinds offer a sleek solution for those who wish to easily control light, visibility and privacy. With a 180 degree tilt, the slimline slats fit tightly when closed to create a blockout blind making them ideal for conference rooms and offices. Available in an extensive range of colours to suit any décor, our aluminium venetians are also extremely practical – easy-to-clean, heat- and moisture-resistant. Can be fitted inside or outside the window frame with left or right control options. Spring-loaded hold down devices are available.

Ideal for large windows and doors such as ranch sliders and bi-folds, and perfect for areas with minimal clearance. Great for commercial applications, our elegant and versatile vertical blinds provide effective light and heat control.

FABRIC
Our vertical blinds are available in **89mm**, **100mm**, and **127mm** slat widths to accommodate all style and design requirements. We offer an extensive selection of quality **blackout** and **light-filtering** fabrics. The PVC-free acrylic coating has anti-fade, easy clean, and antifungal properties. Greenguard Gold Certification ensures low chemical emissions, significantly improving air quality.

SLIM HEADRAIL
Featuring a 28mm slim headrail, our blinds fit seamlessly into lower window frames, providing a sleek and unobtrusive appearance.

DURABLE CARRIERS
Polycarbonate carriers offer superior strength and security, ensuring that your blinds are both sturdy and reliable.

CONTROL OPTIONS
For ease of operation and child safety, we offer wand control, as well as standard chain and cord control. Stainless steel control chain is also available for a premium touch.

TRACK COLORS
Our track colors include White, Birch White and Black, allowing you to match or complement your interior decor.

BOTTOM WEIGHTS
Select from chained or chainless bottom weights, which can be welded or sewn in, to achieve the desired look and functionality.

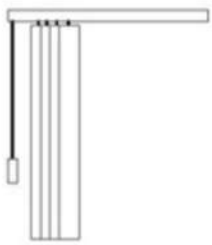

CUSTOM SOLUTIONS
We offer custom-designed sloping blinds to fit non-standard windows, ensuring that every space can benefit from our high-quality blinds.

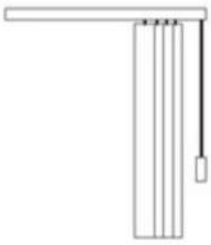

AUTOMATION
For added convenience, our blinds can be automated with the Somfy automation package (Luxaflex® EOS® Helix series only).

WARRANTY
Our products are backed by a 5-year warranty for the standard range and a 3-year warranty for the Luxaflex® range, providing peace of mind and assurance of quality.

11 ROLLER BLINDS

SunGuard roller blinds are custom-made to fit all your specifications. Choose from a variety of fabrics, colours, bottom rails, and control options to enhance any residential or commercial environment. We offer the following types of roller blinds:

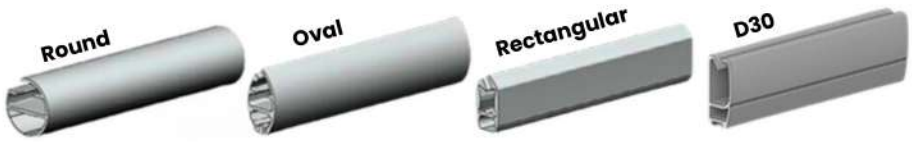

Single Roller Blind
Standard roller blind with one fabric roll, mounted inside or outside the frame.

Linked Single/Double Roller Blind
Two or more blinds connected with a joiner, reducing gaps between adjacent fabrics. Operate multiple blinds with one chain/motor or separately.

Double (Dual or Day-Night) Roller Blind
Two roller blinds on a double bracket, each operated separately. Use semi-transparent fabric during the day and opaque fabric for privacy at night.

Dim-Out Single Roller Blind
Features side channels and a cassette for improved light block. Choose between square and round head box styles.

COMPONENTS
We use high-quality Australian-made Acmeda components with an efficient chain retention system and improved contouring. The Acmeda system secures the chain during operation, reducing drag and noise. Various tube sizes are available to accommodate different blind sizes and fabrics (35mm, 40mm, 45mm, 60mm, 100mm). We offer a variety of bottom rail designs and chains in different colours and lengths.

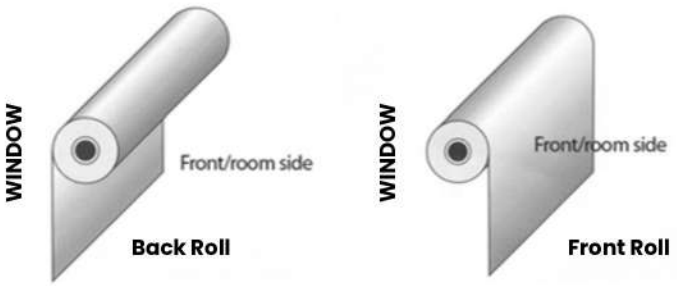

FABRICS
Our wide fabrics selection includes options from market leading brands such as Uniline, GAT, Shaw, Vertex, and Louvolite. These fabrics offer UV protection, are lead-free, tear and mildew resistant, with PVC-free options available. Enjoy peace of mind with warranties of up to 10 years.

Blackout Fabric
Blackout fabrics provide total light control, ensuring complete privacy and enhancing energy efficiency by regulating room temperature throughout the year. Ideal for bedrooms or media rooms, these fabrics effectively block sunlight to create a darkened environment conducive to rest and relaxation. Popular choices include **Dawn** and **Miami** (plain fabric), **Le Reve** and **Cascata** (textured).

Light Filtering Fabric
SunGuard's light filtering fabrics soften natural light while maintaining privacy without sacrificing daytime brightness. They reduce glare and protect against harmful UV rays, perfect for creating comfortable living spaces with a natural, subdued light. Popular options in this category include **Linesque** and **Mantra**.

Sunscreen Fabric
SunGuard offers sunscreen fabrics in various opacities from 2% to 10% openness, preserving natural light and views while providing daytime privacy and UV protection. These fabrics are ideal for offices and study rooms, ensuring a comfortable, well-lit environment essential for productivity. Popular choices include **Uniview 10%** and **Vertex Vision 5%**.

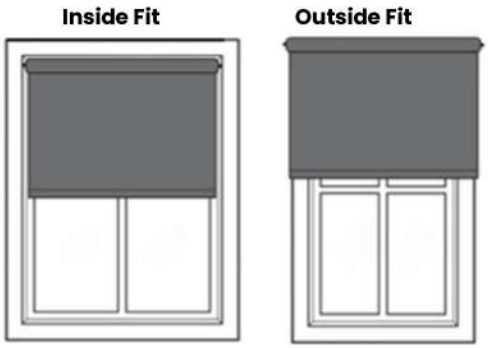

ROLL OPTIONS
Front Roll and Back Roll:
Back roll fabric runs closer to the window, minimizing light gaps at the sides.

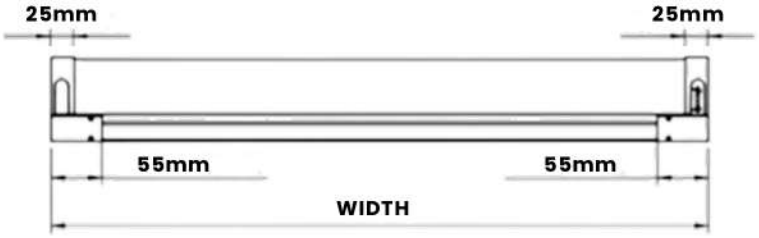

INSTALLATION OPTIONS
Inside Fit: Looks tidy inside the window frame with small light gaps at the sides.
Outside Fit: No light gaps at the sides, with brackets sitting outside the window.

CF90 Square

CF90 Round

CF 90 DIM-OUT

For a more effective blackout solution that removes light gaps at the sides, consider our high-quality **Acmeda dim-OUT system**. This system covers the top and side light gaps present in standard roller shades, enhancing your home's energy efficiency. Please note, however, that this system does not block out 100% of light. With clean lines and harmonious aesthetics, it is available in round or square finishes. Choose from four stylish colors: pure white, black, sandstone, and anodized.

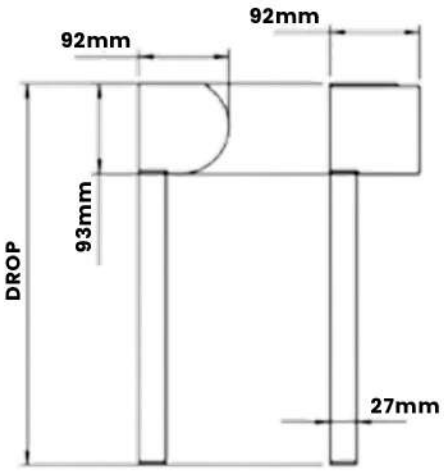

OPERATION

Roller blinds can be operated manually with a chain or automatically for added convenience and functionality.

With **the chain-operated option**, you can customize the length, colour, material, and control side (left or right) of the chain. We offer a variety of chains, including plastic chains in white, black, grey, and birch white, metal and stainless steel chains, which are ideal for coastal and humid areas.

Motorized roller blinds, operated by a tubular motor, offer a modern alternative to traditional chain controls and can be controlled with a remote, wall switch, or phone app, providing flexibility and ease of use.

MOTOR TYPES

- **Hard Wired Motors:** Connect to mains power, wired by an electrician, no charging required.
- **Rechargeable (Wire-Free) Motors:** Equipped with a charger similar to a cell phone charger, they require recharging approximately every 12 months, depending on the model and usage. These motors are easy to install without an electrician and can be charged with a wall charger or a solar panel for continuous power.

CONTROL OPTIONS

Motorized roller blinds can be operated using wired or wire-free wall switches or handheld remote controls, allowing control of up to 16 individual or grouped blinds simultaneously. With a Wi-Fi hub, you can control your roller blinds through a phone app or integrate them into your smart home system, including Alexa, Google Home, and Apple Home. Group shades by room or scene, establish custom schedules, and set timers for convenient and efficient shade control.

Acmeda Automation

AUTOMATION BRANDS

- **ACMEDA**: A US-based company with divisions in Australia and Europe, offering quality motors, controllers, sensors, and smart home integration systems for luxurious and effortless experience.
- **SOMFY**: A leading manufacturer of smart shade solutions with over 50 years of design and innovation history. Based in France, Somfy is known for its European style and premium quality.

12 HONEYCOMB BLINDS

Cosiflor® (Blackout)

Double Cell (Light Filtering)

Cosiflor®

Discover **the Cosiflor® Collection**, where sophistication meets functionality. This honeycomb fabric, featuring a **20mm cell size**, boasts a twin-wall design that creates insulating air pockets, ensuring year-round comfort in your home.
Designed and manufactured in Europe, Cosiflor® is celebrated for its use of high-quality materials and sleek, slimline blind systems. Made with asymmetrical honeycomb shapes, Cosiflor® honeycomb blinds maintain impeccable aesthetics and prevent front pleat sagging, ensuring a consistently smooth and stylish look.

FOR EVERY WINDOW TYPE
Cosiflor® honeycomb blind systems cater to a variety of window types:

- **Standard Windows:** Available in tensioned or free-hanging styles, operated by handle, chain, or cord, with options for remote control
- **Irregularly Shaped Windows:** Offered in fixed or operable configurations, controlled manually or with a cord
- **Conservatory and Ceiling Windows**: Manual or automated options, operated via rod, remote control, or wall switch
- **Velux Skylights:** Easily adjustable with a hinged control stick

FABRIC
Available in shades of grey, beige, and white, Cosiflor® honeycomb blinds cater to diverse interior aesthetics.
The blackout fabrics feature a special aluminum foil lining that enhances insulation properties, making them ideal for maintaining room temperature and privacy. **The light filtering fabrics** have a white backing that diffuses incoming light, creating a soft, ambient glow while maintaining your privacy.

AUTOMATION
Experience the convenience of automated Cosiflor® honeycomb blinds, featuring **Somfy** or **Galaxy motors**, ensuring seamless operation and enhanced comfort at your fingertips.

DAY-NIGHT OPTION
Cosiflor® honeycomb blinds feature a 'Day-Night' option, incorporating two fabrics in one shade for adaptable sun protection. Adjust sunlight levels by choosing denser fabric for maximum shading during quiet times such as daytime naps, and translucent fabric for diffused daylight preferred during work or leisure.

Core Collection

If you're looking for honeycomb blinds that offer affordability without compromising on quality, our **Core Collection** is the perfect choice. Crafted in Taiwan and backed by a 2-year warranty, these blinds are available in two cell sizes: **38 mm (single/double cell)** and **25 mm (single cell**).

FABRIC
Choose from a wide selection of blockout and light filtering fabrics, featuring plain, textured, matte, glossy, linen textures, and designer prints. Our single cell blockout honeycomb blinds feature an aluminum foil lining for enhanced insulation.

OPERATION
Operate your blinds with ease:

- **Standard cord**, similar to venetian blinds
- **Looped cord (clutch operated)**, ideal for children's bedrooms
- **Cordless**, for a sleek and child-safe option
- **Top-Down/Bottom-Up**
- **Day-Night** blinds, combining blackout and light filtering fabrics in one

Day-Night (Light Filtering & Blackout)

Cosiflor® (Light Filtering)

Core Collection (Blackout)

Luxaflex® Duette Shades

SunGuard is proud to be a retailer of Luxaflex®, offering their innovative and high-quality products. Duette® Shades are the premier honeycomb shades system, designed for durability, elegance, and versatility. Made of pleated, reinforced fabrics that form compartments of trapped air, these shades provide ultimate functionality and energy efficiency. The anti-static, dust-resistant fabric makes cleaning easy and promotes better air quality.

SIZES
Available in 10mm and 20mm cell sizes.

CONFIGURATION
- Bottom Up: Traditional operation, raising the bottom rail to open and lowering to close
- Top Down: Covers the lower part of the window while allowing light and view from the top of the window
- Top Down/Bottom Up: Versatile operation from both the top and bottom for optimal light and privacy
- Duo-Lite: Combines two fabric panels for day and night control
- LightLock: Ultimate room darkening with patented side channels

DUETTE® ARCHITELLA® SHADES
The ultimate in honeycomb cellular design, Duette® Architella® Shades feature three internal air pockets for superior insulation and energy efficiency. They can significantly reduce heating costs and improve sound control by reducing noise transmission. Available in an exclusive range of blackout and translucent fabrics, these shades are highly regarded by interior designers.

Architella® Light Filtering Fabric

FABRIC OPTIONS
- Blackout: Complete light blockage, ideal for media rooms and bedrooms
- Translucent: Allows light while protecting furnishings from UV damage
- Sheer: Softens and colours the view outside while blocking minimal light

COMPONENTS COLOURS
Gardenia White, Aspen White, White Tiara, Stone, Pearl Grey, Twilight, Black.

SPECIALTY SHAPES AND DURABILITY
Duette® Shades can be fitted to various window shapes, including semi-circles and bays, and mounted inside or outside of the frames. Made from hard-wearing spun-bonded polyester, they are highly durable and perfect for any setting.

OPERATION
- EasyRise: Continuous loop cord design, ideal for large windows
- LiteRise: Cordless system for added child and pet safety
- PowerView® Automation: Wireless control via remote, app, or voice, with flexible scheduling for energy efficiency
- UltraGlide®: Retractable wand mechanism for child-safe operation
- SkyLift with PowerView® Automation: Perfect for large, high windows, combining energy efficiency with smart technology

Duette® Sheer Fabric

13 PLEATED BLINDS

Conservatory Windows

Irregularly Shaped Windows

Sloping Windows

EASY MAINTENANCE
Our pleated blinds are easy to clean with mild soapy water, making them ideal for busy households.

At SunGuard, we specialize in custom-made **20mm pleated blinds** that fit seamlessly into any space, be it your home, workplace, or boat. Featuring a supportive ladder design to prevent slipping, our pre-tensioned blinds offer precise coverage, making them perfect for skylights, angled windows, roof windows, and conservatories. Engineered with guide wires for stability, they ensure a secure fit without rattling against the glass.

PLEATED BLIND SYSTEMS FOR VARIOUS WINDOW TYPES

- **Standard Windows:** Tensioned or free-hanging, operated by hand, with a rod, chain, or cord. Remote control options available
- **Irregularly Shaped Windows:** Fixed or retractable, controlled by hand or cord
- **Conservatory and Ceiling Windows**: Manual or automated, operated by rod, remote, or wall switch
- **Skylights:** Operated by a hinged control stick for easy adjustment

DAY-NIGHT OPTION
Pleated blinds offer a 'Day-Night' option, combining two fabrics in one shade product for flexible sun protection. This feature allows you to adjust sunlight levels as needed: use denser fabric for maximum shading during quiet times like daytime naps for children, and choose translucent fabric for diffused daylight preferred during work or leisure activities.

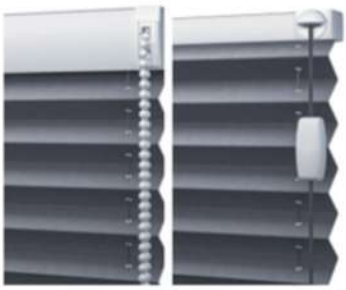

GREAT CHOICE OF COLOURS AND PATTERNS
Our high-quality pleated blinds come in a range of luxurious textures and finishes, including bright colours and bold patterns. We offer vibrant shades like bright green, blue, pink, orange, and yellow, as well as stripes and various patterns to match your decor. Components are available in colours like White, Silver, Grey, Charcoal, Dark Chocolate, and Bronze, for a seamless look.

COMPACT WINDOW TREATMENT SOLUTION
Pleated blinds offer a space-saving design, ideal for areas where every centimeter counts. They occupy minimal space when raised, stacking neatly at the top of the window for an unobstructed view and maximum natural light. Perfect for aluminum joinery, classic timber frames, and modern uPVC windows, they are also great for boats and yachts. Their lightweight yet durable construction suits marine environments, combining functionality with style while maintaining light control and privacy.

EUROPEAN QUALITY
Our fabrics, sourced from German manufacturers J&M and Blocker-Cosiflor®, include metallic prints, solids, patterns, textured jacquards, and pearl reflecting coatings. All fabrics are Oeko-Tex certified, ensuring they are safe, dust-resistant, and durable.

CHILD AND PET SAFETY
Safety is paramount - our blinds offer cordless options or child-safe mechanisms. Corded blinds include the **Child Safety Cord Winder**, which activates automatically when the cord is extended up to 60mm and under a pressure of 6kg.
